SAFe® 6.0 for Architects Certification Training Course Overview

SAFe® Architects fosters collaboration and alignment within enterprises worldwide. The Scaled Agile Framework (SAFe®) empowers organizations to conquer the challenges of developing and delivering enterprise-class software and systems.

By taking this course, individuals will better understand how architecture is vital in facilitating continuous value flow in a Lean-Agile enterprise. Upon completion, graduates will have the skills and knowledge to align architecture with business value, plan the architectural runway for successful delivery, and provide leadership during Lean-Agile transformations.

SAFe® certified professionals are in high demand, known for leading Agile lean transformations, driving sustainable growth, achieving faster time-to-market, and boosting productivity. This program grants the SAFe® 6.0 Architect certification and deepens understanding of the crucial SAFe® Architect role within an enterprise.
