Improved Work Practices:

SAFe® Advanced Scrum Master Training equips participants with the knowledge and skills necessary to drive the successful adoption of advanced engineering practices, DevOps principles, and Agile methodologies. This leads to improved product quality, faster delivery, and increased customer satisfaction.

Effective Motivation and Leadership:

Certified SAFe® Advanced Scrum Masters possess advanced leadership and coaching abilities that enable professionals to motivate and lead Scrum team members effectively. They can create a high-performing team environment, fostering collaboration and innovation.

Competitive Advantage in Job Market:

Attaining the certified SAFe® Advanced Scrum Master credential distinguishes individuals in the job market. Employers value SAFe® certifications as they signify a deep understanding of Agile and Scrum practices, making certified professionals more attractive candidates for job opportunities in Agile organizations.

Multi-Team Productivity Improvement:

With SAFe® principles, Advanced Scrum Masters can apply their knowledge in a multi-team environment. They become skilled at reducing complexity, improving coordination, and aligning the efforts of multiple Agile teams. This leads to increased productivity and the successful delivery of large-scale projects.

Addressing Agile and Scrum Anti-Patterns:

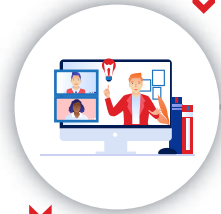

SAFe® Advanced Scrum Master Training equips participants with the tools and strategies to identify and address common Agile and Scrum anti-patterns. This skill is invaluable for overcoming obstacles and ensuring that Agile practices are applied effectively, resulting in smoother project execution.

Your Journey Path to Get SASM Training Course

Get SASM Training: The first step is to attend Simpliaxis SAFe® Advanced Scrum Master training course, two-days instructor-led workshop.

Experience with Practical knowledge & activities:

Actively engage in discussions, exercises, and simulations during the training to maximize your learning experience with our Simpliaxis expert trainers.

Attend Certification Exam: Schedule and take the SASM certification exam. This exam is designed to assess your understanding of the SAFe® framework and your ability to apply it as an Advanced Scrum Master.
